

UNH will provide shuttle rides from the Governor's biodiesel press event in their new buses (see separate calendar listing) around 10:30, enabling attendees to (a) park at West Edge lot and attend the press event, which will showcase the state's new biodiesel refueling facility and UNH's alternative and clean fuel vehicles, followed by a courtesy ride on the new buses to the Alumni Center; or (b) park directly at the Alumni Center or A-Lot from 10:30 on and walk to the GSCCC meeting at the Alumni Center.

At 12:30 attendees can choose to have an informal lunch on their own at the New England Center or the UNH Dairy Bar at the Train Station, both within a 5 minute walk. For those who park at West Edge, a ride will be provided from the Elliott Center back to the West Edge lot at 1:30 pm. Azure Dynamics will have their hybrid electric shuttle bus at the GSCCC stakeholder meeting and can deliver people back to the press event site at the close of the meeting if they are not staying for lunch.
